GFG Article Publication [Link](#) May 2024

Projects

Smart Telecom Cabinet Access Monitoring System

- Developing the Admin Management System in Java for a secure IoT-based cabinet access platform, implementing unlock authorization workflows, device status management, and real-time RS485/RS232 parameter monitoring integrated with mobile and embedded systems.
- Tools Used: JavaScript, React Native, Firebase, Java, Embedded C.

Industrial RS485 Modbus RTU Desktop Application (Python, PyQt5)

- Developed a PyQt5-based desktop tool for RS485 communication implementing Modbus RTU with CRC16 validation, multi-slave support, configurable baud rates, and real-time parameter monitoring and device configuration.
- Tools Used: Python.

Additional Experience And Awards

Build Design + Gen-AI Hackathon by MIT, Pune(07/2023): Secured 3rd place in Build Design + GenAI hackathon, showcasing innovation and AI prowess in crafting novel solutions.

National-level Techathon, Pune (02/2024): Secured 10th rank out of 1000 entries in national-level techathon organized by Innovate for You, in collaboration with educational partners AICTE and SPPU, Pune.

Technologies

Languages: Java, Python, JavaScript, SQL, HTML/CSS.

Frameworks: React Js, Django.

Developer Tools: Visual Studio Code, Eclipse IDE.

Operating System Windows, Mac OS, Linux.

Cloud Technologies AWS (EC2, S3, Lambda), Firebase.
